

Construction Management

EPC Power Management is a unique company that combines high level knowledge with stable manpower. We have been providing structured and stable results in technical complex environments. We do not just provide people: we provide solutions

Quality building and constructing

In the industrial world owners and suppliers both have their own business goals and both talk their own language. The strength of EPC Power Management is that we understand both worlds and speak both languages. With our experience we are perfectly capable to fulfil the role of Construction Management in your project.

Our Construction Managers can direct your supervision / execution team or become part of your organisation. We will support you to reach your business goals. In alignment with your we can prioritize time, money, safety and quality by using experience, fresh thinking and professional creativity.

Having the NEBOSH International Certificate in Construction Health and Safety we will set up a Safety program for the project and keep up your safety track record to the best industrial standards. We are used to execute with Permit to Work systems, Safety Observation Rounds and are always looking for improvement.

All projects are time driven and should be directed from a strict and clear time schedule. Setting priorities, knowing relations between activities, and being flexible are the keys to keep your project within the agreed time schedule. Furthermore, you may want to make use of the service of the time scheduling experts of EPC. We can execute this both on a strategic, tactical or operational level.

With many years experience in the industry we may challenge your engineers in making the best possible design for operation as well as for constructability. We will act as sparring partner in the design knowing that cost optimizations can be made best in the early stages of the project. On request we have specialists and programs available to do and extensive design review or HAZOP studies.

EPC Power has specialists in the field of Quality Assurance and Quality Control. With extensive programs we will ensure that the project will be constructed according to the provided specifications. Our Construction Managers are well trained to manage execution in this way. Apart from this it is important that your project will be built in accordance with the applicable national rules and regulations, in order to make that you get all the necessary licenses to operate your plant. For this reason, we have compliance specialists to assist the Construction Manager in his job, securing the compliancy of your entire project and the use of CE certified products.

After the construction phase it is important that an installation gets into operation smoothly. This commissioning phase is rather complex and needs to be taken into account already during construction. Our construction managers have considerable experience with this, resulting in high level alignments with the commissioning team in an early stage of the project and proper handover / erection completion.

Key knowledge of EPC Power Construction Managers

With integrity as our highest standard our construction managers will turn out to be an absolute asset to your project.
