EPC power management

Document Management

**EPC *Power* Management is a unique company that combines high level knowledge with stable manpower.
We have been providing structured and stable results in technical complex environments. We do not just provide people: we provide solutions**

Integrated Plant Life Cycle Management by EPCPower Management

The intention of proper document management in the vision of EPC power ought to be acomplete, traceable and available set ofdocuments covering all data starting from plantinitiation via engineering, construction andoperation to decommissioning. Our teams have beeninvolved in minor and major investment projectsin the power industry, implementing DMSsystems with a variety of software tools likeDokumentum, Livelink and ThinkProject.

Benefits of IPLCM for Owner Operator Safeguarding Data Availability

Quality and Quantity of the Plant Asset Information

IPLCM or Integrated Plant Life Cycle Managementhas been implemented as a technique in majorCAPEX projects by EPC Power in order to informand train project team members on the issue ofdocument management. Goals are clearly set andprocedures are implemented by EPC teams inorder to support Project Teams as well as futurePlant Owners by safeguarding essential ProjectData by communicating the following goals:

• Transparent, comprehensive documentation
• Clear, logical filing
• Traceable document history (configuration management)
• Proper and complete distribution ofdocuments

IPLCM for Owner Operator

By managing documents for Project teams and arranging early support of Equipment Suppliers, an efficient engineering & construction process is established.

Thinkproject™and EPC Power

EPC Power has formed an alliance with the German based company ThinkProject GmbH. By offering the services of this alliance to ourClients we are convinced we can support ourClients in the best end most effective way inrelation to managing documents in their projects.

ThinkProject offers an internet based system ofdocument management ensuring access to allrelevant project data & drawings throughout theproject life span. By choosing an internet basedplatform we are able to offer our Clients thefollowing services:

• Easily adaptable to Project specific demands
• Data safety by continuous back-up on the ThinkProject servers
• World Wide access to documents via Internet Browser
• Quick search tools, including
• Convenient full-text search
• Server-based optical character recognition (OCR)
• Access rights freely definable
• No need for additional hardware / software
• Comprehensive archive created on project completion
• Independent from Clients IT - organization

We have seen too many examples of projects being obstructed or even stopped for License-to-Operate reasons because of poor document control. The authorities in charge of decisions necessary for your project start-up have to be convinced that your project meets every requirement based on the present regulations and laws before you can even start up.

This clearly shows the need of proper management of information through your project. Do not let your project be the victim of poor datamanagement. Let our specialists and our teams helpyou in turning your project into a success!
